STATE OF MONTANA

DEPARTMENT OF

FISH AND GAME

Helena, Montana
September 14, 1976

RECEIVED
SEP 16 1976
MONT. DEPT. OF NATURAL
RESOURCES & CONSERVATION

Gary Wicks, Director
Dept. of Natural Resources & Conservation
32 South Ewing
Helena, Montana

Dear Gary:

Confirming our Mr. Whitney's conversation with your Mr. Porrini on August 9, we request that you install a pipeline in the tunnel of Painted Rocks Dam to provide a flow estimated to be about 30 cfs during the four-month period the tunnel will be shut off for repair this winter. We understand the flow will be completely shut off for 20 to 40 hours at the beginning of the project while the pipe is being installed, for a similar length of time at the end of the project while the pipe is being removed, and for approximately 8 hours sometime during the project while the alignment of the pipeline is being changed. The effect of a total 40-hour shutoff is likely to be severe. However, we expect the river would be able to recover much more rapidly from two such shutdowns than it could from being shut off totally for four months.

Sincerely,

WESLEY R. WOODGERD
STATE FISH AND GAME DIRECTOR

WRW/ANW/eb
